

NARESH ARYAL

Full Stack Developer — React & Django

Balkot, Bhaktapur, Nepal | +977 9847221589 | aryalnaresh3@gmail.com

<https://github.com/Naresharyal21> | <https://linkedin.com/in/naresh-aryal-493989291>

SUMMARY

Entry-level Full Stack Developer specializing in React and Django REST Framework, with hands-on experience across four end-to-end projects spanning frontend, backend, database, and IoT integration. Skilled in building component-driven interfaces and back-end systems in Python, from RESTful API design with JWT authentication to relational database modeling with the Django ORM. Focused on writing clean, maintainable code and eager to contribute to a collaborative engineering team.

SKILLS

Technical Skills

- Languages: Python, JavaScript, PHP, C, OOP
- Frontend: React (Hooks, Router, Context API), JavaScript, HTML, CSS, Tailwind CSS, Vite
- Backend: Django, Django REST Framework (Serializers, ViewSets & Routers), Django ORM, RESTful API design (pagination, filtering), JWT Authentication, Role-Based Access Control (RBAC)
- Databases: MySQL, SQLite, relational database modeling
- Tools & Platforms: Git, GitHub, Vercel, Postman, Visual Studio Code.
- Testing: Unit Testing, End-to-End Testing, Integrated Testing.

Soft Skills

- Problem Solving & Troubleshooting • Teamwork & Collaboration • Analytical & Critical Thinking • Communication

EXPERIENCE

Full Stack Developer Intern | Code-it | July 2026 – October 2026 (in progress)

- Contributing 8+ Django REST Framework API endpoints and React UI features to CareerLink, a job-connecting platform, working across the full stack from backend logic to frontend integration.
- Collaborating with a 5-member team using Git and GitHub for version control.

PROJECTS

Smart Waste Management Web App | React, Tailwind CSS, Django REST Framework, SQLite, IoT | Final-year project, Nepal College of Information Technology | 2025 – 2026

- Designed a role-based access system with four distinct roles (Admin, Employee, Driver, Supervisor); each role's dashboard restricts data and actions to permissions defined at the API level.
- Built a React and Tailwind CSS dashboard connected to Django REST Framework APIs; built with Vite and deployed to Vercel; version-controlled with Git and GitHub.
- Ingested telemetry from IoT ultrasonic bin sensors across a fleet of under 10 bins on a 10-second polling interval to display live fill-level status per bin in heat maps.
- Wrote route optimization logic that sequences driver pickups by bin fill-level and location to reduce unnecessary stops.

Face Recognition Attendance System | React | Group Project (3 members), 6th Semester | Early 2025

- My contribution: built the entire React frontend — the live capture UI, admin dashboard, and attendance-results display — and integrated it with my teammate's CNN-based face recognition model via API calls.
- Tested the end-to-end recognition and attendance-logging workflow on a sample dataset of 15 faces, achieving 65% recognition accuracy.

E-Commerce Web Application | *React | 5th Semester Project | Early–Mid 2024*

- Built a full-stack e-commerce application: a React and Tailwind CSS frontend using Formik and Yup for form validation.
- Implemented JWT-based authentication, issuing and validating tokens to gate access to protected API routes.
- Implemented client-side routing, state management, and persistent theming using React Router, Hooks, HOCs, and Local Storage.

Courier Service E-Commerce Website | *HTML, CSS, PHP | 4th Semester Project | Early 2024*

- Built a 3-page courier/parcel booking website (order placement, package measurement, and user account management) using HTML, CSS, and PHP.
- Implemented CRUD operations in PHP for order and user account data, including dynamic price calculation based on user-entered package measurements.
- Styled the site with custom external CSS.

EDUCATION

Bachelor of Engineering in Information Technology (BE IT) | *Nepal College of Information Technology, Balkumari, Lalitpur | 2022 – 2026*

- CGPA: 3.20

Diploma, Automobile Technology | *Tokyo Professional College of Automobile Technology, Japan | 2018/04 – 2019/03* *(remained in Japan until 2021/09 due to COVID-19 travel restrictions)*

Japanese Language Program | *Nitto International School, Japan | 2016/07 – 2018/03*

Higher Secondary Education (+2), Science | *New Horizon Secondary School, Butwal | 67.30%*

School Leaving Certificate (SLC) | *River Valley English Secondary School, Palpa | 2012 | 77.50%*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Python with Django — Code-it
- React JS — CREST Technology
- AWS Solutions Architect Associate — In Progress (expected completion: October 2026)
